## TAKEUCHI TB-800 SPECIFICATIONS

### DIMENSIONS

|                                              |       |        |
|----------------------------------------------|-------|--------|
| Overall height (transporting position) ..... | 6'6"  | 1945mm |
| Overall length (transporting position) ..... | 12'5" | 3800mm |
| Overall width .....                          | 4'9"  | 1466mm |

### BUCKET

|                       |                 |                          |
|-----------------------|-----------------|--------------------------|
| Standard bucket ..... | 13.78"-2.70 cft | 350mm-0.08m <sup>3</sup> |
| Optional bucket ..... | 10.24"-1.89 cft | 260mm-0.05m <sup>3</sup> |
|                       | 17.72"-3.51 cft | 450mm-0.10m <sup>3</sup> |
|                       | 19.69"-4.32 cft | 500mm-0.12m <sup>3</sup> |
|                       | 23.62"-5.40 cft | 600mm-0.15m <sup>3</sup> |

### WEIGHT

|                                         |                  |                         |
|-----------------------------------------|------------------|-------------------------|
| Complete machine operating weight ..... | 4366 lbs.        | 1980 kg                 |
| Ground Pressure .....                   | 3.14 lbs/sq. in. | 0.24 kb/cm <sup>2</sup> |

### PERFORMANCE

|                                     |             |          |
|-------------------------------------|-------------|----------|
| Travel speed .....                  | 0.95 m.p.h. | 1.5 km/h |
| Superstructure rotation speed ..... | 8.1 r.p.m.  |          |
| Swingability .....                  | 30°         |          |
| Maximum digging force .....         | 3616 lbs    | 1640 kg  |
| (at bucket tooth)                   |             |          |
| Maximum digging force .....         | 2425 lbs.   | 1100 kg  |
| (at stick boom)                     |             |          |

### WORKING RANGES

|                              |      |        |
|------------------------------|------|--------|
| Maximum depth of cut .....   | 7'1" | 2150mm |
| Maximum dumping height ..... | 7'2" | 2200mm |

### DOZER BLADE

|              |        |        |
|--------------|--------|--------|
| Width .....  | 55"    | 1400mm |
| Height ..... | 11.81" | 300mm  |

### HYDRAULIC UNIT

|                                         |                                  |                        |
|-----------------------------------------|----------------------------------|------------------------|
| Maximum relief pressure set .....       | 1990 p.s.i.                      | 140 kg/cm <sup>2</sup> |
| Hydraulic pump & capacity .....         | gear pump 5.97 gal/min x 2 pumps |                        |
| Hydraulic pump & discharge capacity ... | gear pump 5.97 gal/min x 2 pumps |                        |
|                                         |                                  | 22.6 L/min x 2 pumps   |

### ENGINE

|                              |                     |             |
|------------------------------|---------------------|-------------|
| Make & model .....           | Yanmar 3T72L-TB     |             |
| Rated output .....           | 17 hp/2400 r.p.m.   |             |
| Total displacement .....     | 54.4 cubic inches   | 890 cc      |
| Maximum torque .....         | 40.50 ft.lbs.       | 5.6 kg-m    |
| Cylinder number .....        | 3                   |             |
| Cylinder bore x stroke ..... | 2.83 in. x 2.83 in. | 72mm x 72mm |
| Compression ratio .....      | 23                  |             |
| Fuel consumption .....       | 0.64 gal/h          | 170 g/hp-hr |
| Fuel tank capacity .....     | 7.40 gal.           | 29 L        |

## How to Use Parts List

{ TB 800: 8000 ~ 80919  
 TB 800-1: 80920 ~  
 TB 800F: 90001 ~ } mentioned in this parts list.

### 1. Part code

A . . . . . Maker code

E . . . . . made of Takeshita Iron

B . . . . . Takeshita Iron code

C . . . . . A design change code indicates a transition (new or old) of design changes.

### 2. Engine section

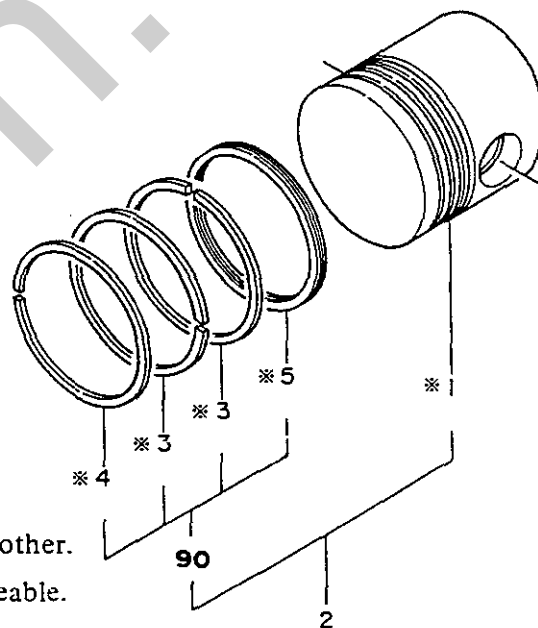

A part, whose Item No. in illustration & Code No. in list have \* mark, not sold by its Code No. order by CMP code or ASS'Y code, where it included.

In its remarks column there's an indication "To ~".

Examples.

Piston ring (top) \* 4 . . . . . Order by ring set 90.

Piston \* 1 . . . . . Order by Piston ring set 2.

### 3. Interchangeability

The following letters (alphabets) are used to indicate presence or absence of interchangeability.

In case of a part, which has "B" indication, order after making sure of its Engine No. Engine No.

A . . . . . Old type or New type, interchangeable with another.

B . . . . . Between New type & Old type, not interchangeable.

C . . . . . Between New type & Old type interchangeable.

Supplied by new part.

D . . . . . Discontinued.

E . . . . . Newly added.

### 4. Parts unavailable Single

Any parts whose Part Codes are marked with " \* " are unavailable singly.

If such a part is desired, obtain by the pertinent assembly part in which the desired part is included.

## 5. Loaded engine

13

\* \* \*

1. MODEL NAME .....Model name whose component parts are listed in this parts catalog is indicated.
2. SECTION CODE .....It is represented in number for each group of the component parts and indicates the functional section of the machine.
3. ITEM NO. ....It is assigned to each group and stands for page number.
4. NAME OF GROUP .....It shows each group of the component parts functionally classified or it is sometimes represented by the name of the main parts of the group.
5. NO. ....It refers list numbers to illustration numbers corresponding each others.
6. LEVEL .....It shows the compositions of ASSY & COMP. in dot mark(s) “. ” or “ . ”.
7. ORDERING CATEGORY .....When the component parts are modified into new type, the old type parts corresponding to them are marked with “ \* ”.  
  
In this case, please place an order by referring to the new type parts.
8. PART NUMBER .....Refer to the item “regarding part number.”

9. PART NAME .....The part name is written in Japanese letters, numerals, alphabet letters and symbols within 20 letters in number.
10. QUANTITY .....It shows the quantity of parts required for each item number.
11. INTERCHANGEABILITY .....When the component parts are modified, the following symbols are given to the old parts in the newly superceded pages.
- A.....Interchangeable either from new type to old type or from old type to new type
- B.....Not interchangeable
- C.....Interchangeable with both new type and old type
- D.....Discontinued
- E.....Newly added parts
12. REMARKS .....When the component parts are modified, applicable models or applicable periods for the old type parts are indicated in this column.
13. TO BE CONTINUED  
TO THE NEXT PAGE .....It shows the case where a listed part included in same item number is continued to the next page.

[Example]

MODEL NAME TC440

PART CODE 630

### 38. TRAVEL OPERATING SECTION 1

| No. | LEVEL | ORDER QTY. | PART NUMBER  | PART NAME                        | Q'TY | INTER-CHANGE-ABILITY | REMARKS (Machine No.). |

| 10  | ..    |            | 1E6270-6386C | STOP SWITCH gear                 | 1    |                      |                        |
| 11  | ..    |            | 22217-080000 | SPRING WASHER 8                  | 1    |                      |                        |
| 12  | ..    |            | 26717-080002 | NUT M8                           | 1    |                      |                        |
| 13  | ..    |            | 7E6070-6C35C | ACCELERATOR LEVER, w/wire        | 1    |                      |                        |
| 14  | ...   |            | 7E6070-60360 | ACCELERATOR LEVER                | 1    |                      |                        |
| 15  | ...   |            | 1E6070-63430 | WIRE, accelerator lever          | 1    |                      |                        |

The dot marks in the LEVEL column mean as follow:

The COVER ASS'Y of item No. 1 is comprised of the component parts No. 2 — 22.

The COVER, w/plate of item No. 2 is comprised of the component parts No. 3 — 9.
