⚠ CAUTION

OPERATION AND MAINTENANCE

(1) Every three months (500hours) check and clean the lined bearing for side shift.
If used on dirt road or in dusty environment, the bearing surface should be checked more frequently.

(2) Replace the bearing segment when the lining thickness becomes less than 2.5 mm.
After the replacement, apply grease on the bearing surface.

DJ

⚠ WARNING

Notes on Side-shifting Operation

(1) When a load on the forks is shifted to one side, shift the forks sideaways so that the load is properly positioned between the forks.

(2) When the height of the forks is more than 150cm(60in), special care is required. Careless shifting may cause the machine to tip over. Shift the forks gently. Don't shift the forks more than requirede.
