# PREFACE

- This parts catalog contains parts used for all the machines having machine numbers following the numbers mentioned on the face.
- Prior to placing orders, verify that part numbers used correspond with those on the specification for the actual machine, because this catalog also contains the part list corresponding to the specifications for machines other than those delivered.

- For engine parts, refer to the Chapter "ENGINE COMPONENTS".
- Since products are continually improved, changes could not be described on the part catalog. The revised revision describing those changes will be issued, as required.
  For farther information, please contact our nearby branch, or representative.
- For the machine, the boom side is "Front", Counterweight side is "Rear", and the opposite side is "Right".
  For the track part the travel motor side is "Rear".

1. Precautions for use of wide bucket
Use a wider bucket only for work on light duty (loading and light digging loose soil)
Since the bucket has large capacity, the stability of machine is decreased. Try to use the bucket in a small working range as much as possible.

2. Precautions for use of wide shoe
Wide shoes are intended to use for general civil engineering work. Do not employ wide shoes on rough ground (site covered with much rocks and mravels).
